Algorithm Development
Research and develop methods for outfit recommendation & try-on

Prototype Development
Develop prototype to test ideas and gather feedback

Algorithm & UI/UX improvement
Improve our algorithm and UI/UX based on the results of pilot study

Summative Study
Conduct an online survey to evaluate our system: publish website and collect feedback

Algorithm Evaluation
Evaluate our methods compared to others on standard datasets

Pilot Study
Conduct a small-scale study to test our work, validate requirements, get feedback

Minimum viable product (MVP)
Build a minimum viable product
